sales@enconnex.com

The Enconnex Power Cords are most commonly used between a device and a PDU mounted in a rack or a cabinet. These power cords can connect directly to standard outlets, a compatible UPS or PDU with AC outlets. In data center environments Enconnex power cords can be made with lengths in mind to keep excess cabling to a minimum, avoid contact with Ethernet cables which eliminates cross talk and reduces risk of accidental power loss.

PRODUCT FEATURES

- Available in multiple lengths
- C13 and C14 Connectors

PRODUCT SPECIFICATIONS

- Offered in 18AWG
- Standard black, custom colors optional
- UL rated
