

Cabinet Bottom Panel - 2 Holes

The Enconnex cabinet bottom panels provide coverage underneath the rack, help maintain clean cable installations and assist with front-to-back cooling.

APPLICATION

- Heavy cabling applications where an open bottom is required (raised floor); Environments where dust or debris could get into the cabinet.

PRODUCT FEATURES

- Solid steel construction
- Available in a solid panel or with two (2) holes to allow for cable runs
- Integrate with your Enconnex cabinet
