

# C13 to C14 Power Cord

SKU#: ECX-C13C14-10XX18T-YY

Enconnex Power Cords are most commonly used between a device and a PDU mounted in a rack or a cabinet. These power cords can connect directly to standard outlets, a compatible UPS, or PDU with AC outlets. In data center environments, Enconnex power cord lengths can be customized to the customer's exact needs keeping excess cabling to a minimum and avoiding contact with Ethernet cables which eliminates cross talk and reduces risk of accidental power loss.

## PRODUCT FEATURES

- Available in various lengths
- C13 and C14 connectors

## PRODUCT SPECIFICATIONS

- Offered in 18AWG
- TPE jacket material
- Standard black, custom colors optional
- UL rated
