

# C13 to C14 Power Cord w/ W-Lock

SKU#: ECX-C13C14WL-10XX18-YY

Enconnex Power Cords are most commonly used between a device and a PDU mounted in a rack or a cabinet. These power cords can connect directly to standard outlets, a compatible UPS, or PDU with AC outlets. In data center environments, Enconnex power cord lengths can be customized to the customer’s exact needs keeping excess cabling to a minimum and avoiding contact with Ethernet cables which eliminates cross talk and reduces risk of accidental power loss.

## PRODUCT FEATURES

- Available in various lengths
- PVC jacket material

## PRODUCT SPECIFICATIONS

- Offered in 18 AWG
- W-lock provides secure fastening to Enconnex PDU
- UL rated

## PHYSICAL SPECIFICATIONS

Amperage	10A Max
Voltage	250V Max
Input Connection	C14 w/ W-Lock
Output Connection	C13
Gauge	18AWG
Jacket Material	PVC
Available Lengths	Various lengths
Safety Compliance	UL/CUL
Environmental Compliance	RoHS
