

C13 to C20 Power Cord

SKU#: ECX-C13C20-15XX14-YY

Enconnex Power Cords are most commonly used between a device and a PDU mounted in a rack or a cabinet. These power cords can connect directly to standard outlets, a compatible UPS, or PDU with AC outlets. In data center environments, Enconnex power cord lengths can be customized to the customer's exact needs keeping excess cabling to a minimum and avoiding contact with Ethernet cables which eliminates cross talk and reduces risk of accidental power loss.

PRODUCT FEATURES

- Available in various lengths
- C20 and C13 connectors

PRODUCT SPECIFICATIONS

- Offered in 14AWG
- PVC jacket material
- Standard black
- UL rated
