

C19 to C20 Power Cord w/ W-Lock

SKU#: ECX-C19C20WL-20XX12-YY

Enconnex Power Cords are most commonly used between a device and a PDU mounted in a rack or a cabinet. These power cords can connect directly to standard outlets, a compatible UPS, or PDU with AC outlets. In data center environments, Enconnex power cords can be made with lengths in mind to keep excess cabling to a minimum, avoid contact with Ethernet cables which eliminates cross talk and reduces risk of accidental power loss.

Figure 1 - C19 to C20 12AWG W-Lock Power Cord

PRODUCT FEATURES

- Locking mechanisms on both ends of the cord
- Available in various lengths
- PVC Jacket Material

PRODUCT FEATURES

- Offered in 12 AWG
- W-lock provides secure fastening to Enconnex PDU
- UL rated

PHYSICAL SPECIFICATIONS

Amperage	20A Max
Voltage	250V Max
Input Connection	C20 w/ W-Lock
Output Connection	C19
Gauge	12AWG
Jacket Material	PVC
Available Lengths	Various lengths
Safety Compliance	UL/CUL
Environmental Compliance	RoHS
