

Roof Fan Tray

The Enconnex Roof Fan Tray replaces the standard cabinet roof with a six fan tray unit allows for heat to be efficiently removed from the rack. This helps to maintain a consistent and safe temperature for the equipment in the cabinet.

APPLICATION

Cabinet roof integrated with 6 fans used to enable the exhaust of equipment generated heat from a cabinet.

PRODUCT FEATURES

- Six (6) high-speed fans quickly and quietly remove unwanted heat from your cabinet
- Unit can vent to the room or be integrated with your data center HVAC system
- Roof is easily replaced in the event of failure
