

Cabinet Door – Single Plexiglass

The Enconnex Single Plexiglass door is constructed out of a steel frame with a solid, clear plexiglass insert. This is made up of single plexiglass, and is generally used in low-density applications where heat is less of a concern.

APPLICATION

- Low-density or networking cabinets where heat is less of a concern; in conjunction with additional cooling units to provide a quiet operating environment for smaller spaces.

PRODUCT FEATURES

- Solid steel construction
- Clear plexiglass insert to easily view your equipment
- Reduces equipment sound inside the cabinet
