The Enconnex ECX series server cabinet is the ultimate solution designed and engineered for demanding data center environments.

PRODUCT FEATURES

- Solid steel construction provides some of the best load ratings in the industry
- High-efficiency perforated doors allow for maximum airflow
- Dual side panel design makes accessing the side of your equipment quick and easy
- Split rear doors allow for maximum rear access while reducing footprint
- Matching locks on the doors and panels for a secure solution that is easy to manage
- Modular roof panel with large cable pass-throughs for oversized cable bundles
- Removable roof vent panel for quick installation of chimneys or fan systems
- Adjustable equipment rails with number labeling on both sides
- 3" HD casters to make rolling a loaded cabinet smooth and simple

PRODUCT BENEFITS

- Engineered to make equipment installation simple and efficient
- Split rear doors reduce footprint and provide better access to equipment
- Can easily be bundled with containment options to create hot / cold aisle solution
- Full range of accessories to meet your airflow and cable management needs

INCLUDED EQUIPMENT

- Solid steel, four post open frame
- Locking, dual side panels (4 per complete cabinet)
- Single perforated front door with locking handle
- Dual split rear perforated doors with locking handles

- Removable roof vent panel with hardware
- Equipment mounting rails, adjustable, with hardware
- Two (2) PDU mounting bars with hardware
- Leveling feet and 3" HD casters
- Keys for all locks

PRODUCT SPECIFICATIONS

Cabinet Style	Floor Standing
Castors	3" High-Grade
UL Rating	60950
RoHS / ELV Compliance	RoHS Compliant, ELV Compliant
NOM	Tested for NOM Compliance
Approvals	EIA / ECA-310-E
Colors	Black, White, Custom (Upon request)
Weight Capacity - Stationary (lbs.)	3300
Weight Capacity - Rolling (lbs.)	2600
Units Per Pallet	1

SEISMIC SPECIFICATIONS

Standard Cabinet Our standard cabinet can be configured with a Zone 4 mounting kit and baying kit to meet current Zone 4 compliancy in seismic areas.

Seismic Cabinet Our seismic cabinets are engineered to meet current GR-63-CORE, NEBS seismic standards. These cabinets are manufactured with a welded design to ensure structural rigidity in seismic areas.
