

HD MTP to LC Cassette

SKU#: ECX-3XMTP-24LC-SM-HDC

The Enconnex 3x8F MTP-LC cassette is designed for plug and play connections to trunk cables. The cassette is terminated with MTP connections to LC, and allows the end user to migrate from 10G, 40G, and 100G connections without needing to alter the horizontal structure of the trunk cables. The ease of use guarantees fast and future proof deployment into data centers, labs, and colocation environments.

PRODUCT FEATURES

- Fitted with 8-Fiber MTP connectors
- Easy transition to trunk cables terminated with MTP connections to LC
- 10G, 40G, 100G, and feedthrough options available
- Front and rear access
- Quick installation with push and pull tab to lock or unlock; no tools required
