

C13 to C14 Power Cord w/P-Lock

SKU#: ECX-C13C14PL-13XX16-YY

Enconnex Power Cords are most commonly used between a device and a PDU mounted in a rack or a cabinet. These power cords can connect directly to standard outlets, a compatible UPS, or PDU with AC outlets. In data center environments, Enconnex power cord lengths can be customized to the customer's exact needs keeping excess cabling to a minimum and avoiding contact with Ethernet cables which eliminates cross talk and reduces risk of accidental power loss.

PRODUCT FEATURES

- Locking mechanism on PDU side
- Available in various lengths
- C14 and C13 w/ P-Lock connectors

Figure 1 - C13 to C14 w/P-Lock 16 AWG Power Cable

PRODUCT SPECIFICATIONS

- Offered in 16 AWG
- Custom colors optional
- UL rated

PHYSICAL SPECIFICATIONS

Amperage	13A Max
Voltage	250V Max
Input Connection	C14 w/P-Lock
Male Connector	C13
Gauge	16AWG
Jacket Material	PVC
Available Lengths	Various lengths
Safety Compliance	UL Components
Environmental Compliance	RoHS
