

C19 to L6-20P Power Cord

SKU#: C19L620P-20K12P-XXFUL

Enconnex power cords are most commonly used between a device and a PDU mounted in a rack or cabinet. These power cords can connect directly to standard outlets, a compatible UPS, or a PDU with AC outlets. In data center environments, Enconnex power cord lengths can be customized to the customer's exact needs, keeping excess cabling to a minimum and avoiding contact with Ethernet cables, which eliminates crosstalk and reduces the risk of accidental power loss.

PRODUCT FEATURES

- Available in various lengths
- Flexible SJT jacket
- Standard black (custom colors available)
- High-quality construction

PHYSICAL SPECIFICATIONS

Amperage	20A Max
Voltage	250V
Input Connection	L6-20P
Output Connection	C19
Gauge	12AWG
Jacket Material	PVC
Standard Lengths	3 ft, 6 ft, and 10 ft
Safety Compliance	UL Components
Environmental Compliance	RoHS
