Company Overview

ENCONNEX®
Born to Innovate™

Who Are We?

We were "Born to Innovate." We design, develop, and manufacture data center and IT infrastructure products and solutions. Our product lines are always high quality and value-priced.

Who Do We Serve?

Primary: Data Centers (Hyperscale, Colo/Multi-Tenant, Enterprise, Micro, Edge)
Secondary: IT Integrators and Managers. Anyone deploying IT infrastructure at scale.

What Makes Us Unique?

- Our products come with excellent margins.
- Custom solutions at scale. We develop products to spec. for large-scale deals.
- We're a one-stop shop for data center and IT infrastructure products.
- Extensive experience with hyperscale and fortune 500 companies (Google, Apple, Alibaba, PayPal, Tencent, Equinix, etc.)
- Extensive experience working with government agencies and government contractors (Northrup Grumman, NASA, Department of Defense, etc.)

Our Product Lines

Racks, Cabinets, and Accessories

- Data center cabinets, standard server/network cabinets, cable managers, shelves, etc.
- Variety of heights, widths, depths, and colors are available.
- All cabinets ship fully assembled.

Micro Data Center Cabinets for Edge Computing

- With up to 8kW of self-contained cooling, they're like having an on-site data center.
- EdgeRack 3P for traditional networking environments and small to mid-size businesses.
- EdgeRack Industrial 8M for less-controlled industrial environments (NEMA 12 and IP55-rated).

RF/EMI Shielded Cabinets (DefenseShield®)

- Designed for defense and cybersecurity applications.
- Up to 90dB of attenuation at frequencies ranging from 1Mhz-10Ghz.
- Standard cabinet and wall mountable options.

Real Device Testing Cabinets (DevShield™)

- Shielded and non-shielded cabinets for enterprise real device testing (IoT, apps, mobile devices, etc.).
- Customizable I/O panel and shelves designed for different device types.
- Standard cabinet and mini size options.

PDUs

- Basic, switched, and metered options are available.
- Single and 3-phase, as well as vertical and horizontal options.
- Our TAA-compliant PDUs are assembled in America for government applications and reduced lead times.

Network Cabling

- Copper cables, fiber cables, AOC/DAC cables, transceivers, patch panels and cassettes, adapters, and accessories.
- Local copper cable manufacturing capabilities.
- Variety of sizes, lengths, colors, modes, transmission speeds, terminations, etc.

Power Cords

- Locking and non-locking power cords in TPE and PVC materials.
- Supports all common plugs and receptacles (international and domestic).
- Variety of sizes, lengths, and connectors are available.

Containment

- Hot and cold aisle containment solutions.
- Customizable, built-to-spec configurations with quick deployment.
- Variety of roof, duct, door, and frame options.
