

EdgeRack Input Cord - US

SKU#: E050001-01B

Enconnex EdgeRack input cords supply power to the built-in, self-contained cooling unit in the EdgeRack 5M and 8M models. These cords are available for both US and EU customers and are connected to the cooling units via three wires with crimped terminals on the output end of the cord. Each cord is 13 feet (4 m) long and sold separately from the EdgeRack cabinets.
