

Front-to-Rear Cable Trough Installation Guide Ref. P/N: E010012-00x

Tools Required:

- #2 Phillips Head Screwdriver

Steps:

1. Position the front and rear vertical mounting rails to desired locations (see InfiniRack User Manual).
2. Extend the cable trough and position between the front and rear vertical mounting rails at the desired location. It is recommended the cable trough be installed aligned with the bottom of the cable grommets in the vertical mounting rails.
3. Secure the cable trough to the vertical mounting rails using the supplied phillips head screws (see image a left).
