# Electrical Metallic Tubing

Galvanized Steel Electrical Metallic Tubing (EMT) is a crucial product in industrial, commercial construction and residential applications. EMT protects wires from impact, moisture and chemical vapors.

## Features

- Made from carbon steel coil
- Zinc coated with a hot dip galvanizing process
- Interior and exterior have a smooth welded seam
- Superior corrosion resistance
- Range of diameters from ½" – 4"
- Meets or exceeds ANSI C80.3 and UL 797 standards
- Meets or exceeds CAN/CSA-C22.2 No. 83.1 (2007) standards
- UL Listed

EMT Length: 10 ft. (3.048 m)
