

Enconnex Enterprise Enclosures Powered By Liberty

New Integrated InfiniRack Wall Mount Cabinet

Unified Infrastructure, Simplified Deployment

Liberty and Enconnex have partnered to deliver reliable, secure solutions for modern enterprise infrastructure. Combining the new Enconnex InfiniRack Wall Mount Cabinet with Liberty's power and cabling products provides a purpose-built environment for security, A/V, and network systems—without compromising performance, protection, or price.

Front Interior (Render)

Pre-delivery hardware integration services available.

Enconnex InfiniRack Wall Mount Cabinet

- For environments where floor space is limited and security is essential.
- Applications: Security, A/V, enterprise networks, more.
- Four heights (9U, 12U, 18U, 24U). Three depths (18", 24", 30").
- Standard 19" EIA rack mount design.
- UL 2416 listed.
- Three-piece swing-out design for easy access to front and rear of equipment.
- Rear chassis is removable and mounts to wall first for simplified installation
- Push button latch behind front door releases the center chassis from the rear.
- Dedicated provisions for conduit, cord, cable, and wall outlet access.
- Patented rear cutout for pre-terminated, working patch panel.
